WEATHER FORECAST

THURSDAY 23: Rather sunny and settled weather specially in the morning, with scattered or broken sky due to moderate cumuliform cloudiness, which could cause some isolated rashes or thunderstorm especially in the afternoon (30/50%).

Temperatures: Generally slightly rising everywhere. At 1500 m: min 14°C max 19°C; at 2200 m: min 11°C max 16°C.

Wind: In the valley light/moderate due to breezes; top mountains moderate winds from south-west, 10-20 km/h at 2000 m, 15-25 km/h at 3000 m.

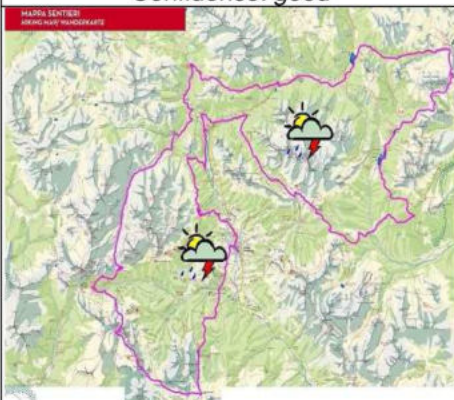

Thursday 23
 Confidence: good

FRIDAY 24: Until early morning possible low clouds. During the day rather sunny weather, but with diurnal cumulus clouds a little more intense than Thursday, which will partly limit the sunshine in the afternoon/evening, with chance higher than the day before of some showers or thunderstorms (50/60%). Still summer like diurnal temperatures.

Temperatures: stationary. At 1500 m: min 13°C max 19°C; at 2200 m: min 10°C max 14°C.

Wind: In the valley light/moderate due to breezes; top mountains moderate/fresh winds from south-west, 10-20 km/h at 2000 m, 20-40 km/h at 3000 m.

Friday 24
 Confidence: good

TREND

SATURDAY 25: Rather sunny weather, moderately warm and mostly settled, even if a wider cumuliform cloudiness will be possible in the day, with some rashes or thunderstorms possible in the afternoon/evening. Slightly decreasing temperatures Light/moderate top mountain winds from south-west, breezes in the valley.

SUNDAY 26: Mostly sunny weather, with clear or scattered sky due to weak cumulus clouds in the day, with low chance of precipitation. Moderately warm diurnal climate. Slightly rising diurnal temperatures and warm diurnal climate. Light/moderate top mountain winds from south-west, breezes in the valley

Forecaster: DDL
