 Lavaredo Ultratrail

Centro Valanghe di Arabba
Alpine Meteorology Office

SYNOPTIC SITUATION: A cyclonic structure on Spain only marginally affects weather on the Venetian Alps, bringing currents of warm but sometimes humid and unstable airmass today and tomorrow. Thermal conditions remain typically summer like, with values above the average.

Sea surface prognostic chart for 12 GMT of Friday 24th June 2022

Today: Partly sunny weather, with scattered or broken sky due to moderate cumuliform cloudiness, which could cause some isolated rashes/thunderstorm especially in the evening (40/60%). Rising temperatures respect to Wednesday in the valley, with High values around 22/24°C at Cortina and 13/15°C at 2000 m. Fresh/moderate winds aloft from south-west, light/moderate ones in the valley.

Freezing level h12 (m)

WEATHER FORECAST

FRIDAY 24: Variable and instable weather towards evening. Until early morning low clouds. During the day irregularly cloudy, cloudiness more intense than Thursday, which will limit the sunshine in the afternoon/evening, with chance higher than the day before of some showers or thunderstorms (50/60%) Still summer like diurnal temperatures.

Temperatures: Falling At 1500 m: min 13°C max 17°C; at 2200 m: min 9°C max 13°C.

Wind: In the valley light/moderate due to breezes; top mountains fresh to strong winds, 10-35 km/h at 2000 m, 20-60 km/h at 3000 m.

SATURDAY 25: Sunny weather, moderately warm and mostly settled, even if a wider cumuliform cloudiness will be possible in the day, with low chance (10-30%) of rashes or thunderstorms in the afternoon/evening. Light/moderate top mountain winds from south-west, breezes in the valley.

Temperatures: Falling low values, raising the Highs. At 1500 m: min 10°C max 18°C; at 2200 m: min 8°C max 14°C.

Wind: In the valley light/moderate due to breezes; top mountains light westerly winds, 5-15 km/h at 2000 m, 5-15 km/h at 3000 m.

Friday 24
 Confidence: good

Saturday 25
 Confidence: good

TREND

SUNDAY 26: Mostly sunny weather, with clear or scattered sky due to weak cumulus clouds in the day, with very low chance of precipitation. Moderately warm diurnal climate. Slightly rising diurnal temperatures and warm diurnal climate. Light/moderate top mountain winds from south-west, breezes in the valley

Forecaster: DDL
